DENZA™

Pre-Treatment
Guide

- Upon arrival for treatment, patients' skin should be clean, without makeup, cosmetic products, perfumes or lotions.
- Always obtain thorough medical history, including medications and obtain consent.
- Take before photos and measurements.
- Remove all jewelry, including necklaces, bracelets, watches, earrings, and any other piercings.
- Patients should discontinue the use of Retinols, AHA/BHA, and tretinoin in the intended area of treatment 24 hours prior to treatment.
- If necessary, patient should shave treatment area 1 day prior to treatment.
- Ensure injectables including neurotoxin, and dermal fillers have not been given in the last 2 weeks prior to treatment.
- Stay hydrated. Drink plenty of water for several days in advance of treatment.

Post-Treatment
Guide

- Clean and dry area of treatment.
- Apply moisturizer with SPF 30 or higher post treatment, and encourage daily use.
- Hydrate after treatment.
- Some patients may experience mild swelling and redness, typically resolving within 24 hours after treatment.
- Patients may cleanse with lukewarm water using a gentle cleanser, avoiding hot water when washing/ showering until any erythema has subsided.
- Patients may resume normal skincare 24 hours post treatment.
- Avoid excessive exercise, sweating, hot baths and saunas for 72 hours post treatment.
- Number of treatments will vary, depending on age, skin condition, medical history and medication use.
